EDUCATION

California State Polytechnic University, Pomona

Aug 2023 - May 2027

GPA: 3.67/4.0

Relevant Coursework: Circuit Analysis, Signals & Systems, Power Engineering, Microcontrollers, Digital Logic Design, Microelectronics, Data Structures & Algorithms, Linux Programming

SKILLS

Hardware: Circuit Design, Schematic Capture, PCB Design (KiCad), Oscilloscopes, Digital Multimeters, Logic Analyzers, Soldering, Microcontrollers (RP2040, PIC/MPLAB, Arduino)

Software: PSpice, MATLAB, Simulink, KrakenSDR, Altium, Python, MPLAB, Microsoft Excel

Technical Interests: Embedded Systems, Robotics, Electrical Infrastructure, Power Systems

EXPERIENCE

Electrical Engineering Intern

Jun 2026 – Aug 2026

Bay Cities Packaging & Design, Pico Rivera, CA

- Supported integration of an Adafruit Feather RP2040-based LoRa wireless sensor system for real-time monitoring of corrugated machinery, contributing to a predictive maintenance initiative aimed at reducing unplanned downtime
- Automated machine hour allocation and daily availability tracking for all 10 plant machines using a Python-based scheduling dashboard, reducing manual scheduling time by 1 hour/day and minimizing conflicts by finding open slots for PMs to be scheduled
- Improved preventative maintenance documentation company-wide by reorganizing procedures into easy-to-follow instructions, reducing redundant steps and making it simpler for technicians to diagnose and service machinery

Student Activities Assistant

Jan 2025 - Present

Associated Students, Inc., Cal Poly Pomona

- Coordinated logistics for 10+ campus events serving up to 5,000 attendees, managing vendor contracts and facility scheduling under tight deadlines

Peer Mentor

July 2024 - Feb 2025

Division of Student Affairs, Cal Poly Pomona

- Mentored eight first-year engineering students; 100% retained through their first academic year through weekly support sessions and goal-setting meetings

Google Kapwa Mentorship Program

August 2024 - Dec 2024

Mentee

- Selected for a competitive mentorship program where I gained insight into career development, technical growth, and workplace culture through 1:1 mentorship and workshops with Google professionals

Consultant

Jan 2024 - April 2024

IXL Digital Growth Accelerator 2024 | Consulting Case Competition

- Consulted with a small business in facilitating 20% growth for their company via social media promotion and new sales initiatives

PROJECTS

Northrop Grumman Collaboration Project (NGCP) – Cal Poly Pomona

Radio Frequency Engineer, UAV Team | KrakenSDR, Altium

Jul 2026 – Present

- Selected to configure antenna arrays and KrakenSDR hardware for an RF direction-finding system, supporting a triangulation pipeline that will localize survivors for autonomous UAV search-and-rescue missions

Systems Engineer, UGV Team

Aug 2025 – Jun 2026

- Supported development of an unmanned ground vehicle through requirements tracking, risk assessment, and engineering documentation in compliance with DoDAF standards
- Collaborated across multidisciplinary engineering teams to verify that subsystem components met design requirements and constraints outlined by Northrop Grumman

Bronco Bond Mobile Application | Python, Node.js, MongoDB

2023 - 2024

- Built a Node.js and MongoDB backend supporting web scraping, user authentication, data storage, and real-time interactions for a campus social platform

STUDENT INVOLVEMENT

Kellogg Honors College

2024 - Present

Secretary, CPP Pilipino Graduation

2025 - 2026

President, Secretary, CPP Sportsfest

2024 - 2026

- Led scheduling, venue reservations, and team communications for CPP's largest student-led sports tournament, hosting 200+ participants
